braun.jay@outlook.com

Summary

10+ years of work experience in various roles, including machining, security, auto body painting, assembly, and freelance web development. Proficient in HTML, CSS, JavaScript Basics, and WordPress Basics. A hardworking individual who is always eager to learn and willing to adapt to new challenges. I pride myself on my work ethic, ability to multitask and my time management skills. Currently pursuing an undergraduate degree in Computer Information Systems.

In my spare time, I have been working on projects to help showcase my knowledge in front and back-end development.

Experience

Clinical Service Representative
WashU/Hybrid | 2025-Present

- Responsible for obtaining, sorting, scanning and indexing high volume of patient health information into the appropriate electronic chart.
- Assist other office employees with issues that may occur.
- Responsible for incoming and outgoing calls to patients, healthcare providers, and insurance companies.

Freelance Junior Web Developer
Remote | 2024-Present

- Designed and customized WordPress websites for clients, integrating blog, e-commerce, and media features.
- Provided ongoing technical support to users, including troubleshoot plugin/theme conflicts and explaining system behavior in simple terms.
- Managed client communications across time zones using email, screen-sharing tools, and written walkthroughs.

Assembly Line Operator
Innovative Staff Solutions | 2022 | 2024-2025

- Operated and maintained production equipment for Honda oil pans and GM spoilers.
- Took on training responsibilities, guiding new hires through step-by-step processes and quality standards.
- Ensured workflow efficiency while meeting strict accuracy benchmarks and safety requirements.
- Identified and resolved process errors to reduce downtime and maintain throughput.

Correctional Officer
Illinois Department of Corrections | 2022-2024

- Maintained safety and compliance within correctional facilities through close monitoring and strategic communication.
- Operated control systems and conducted regular security checks with high attention to detail.
- Built rapport and applied de-escalation techniques to reduce incidents and improve overall unit environment.
- Documented incidents, maintained accurate logs, and followed protocol under pressure.

Education

A.A.S. in Computer Information Systems
Southwestern Illinois College | 2014-Present
(In Progress)
